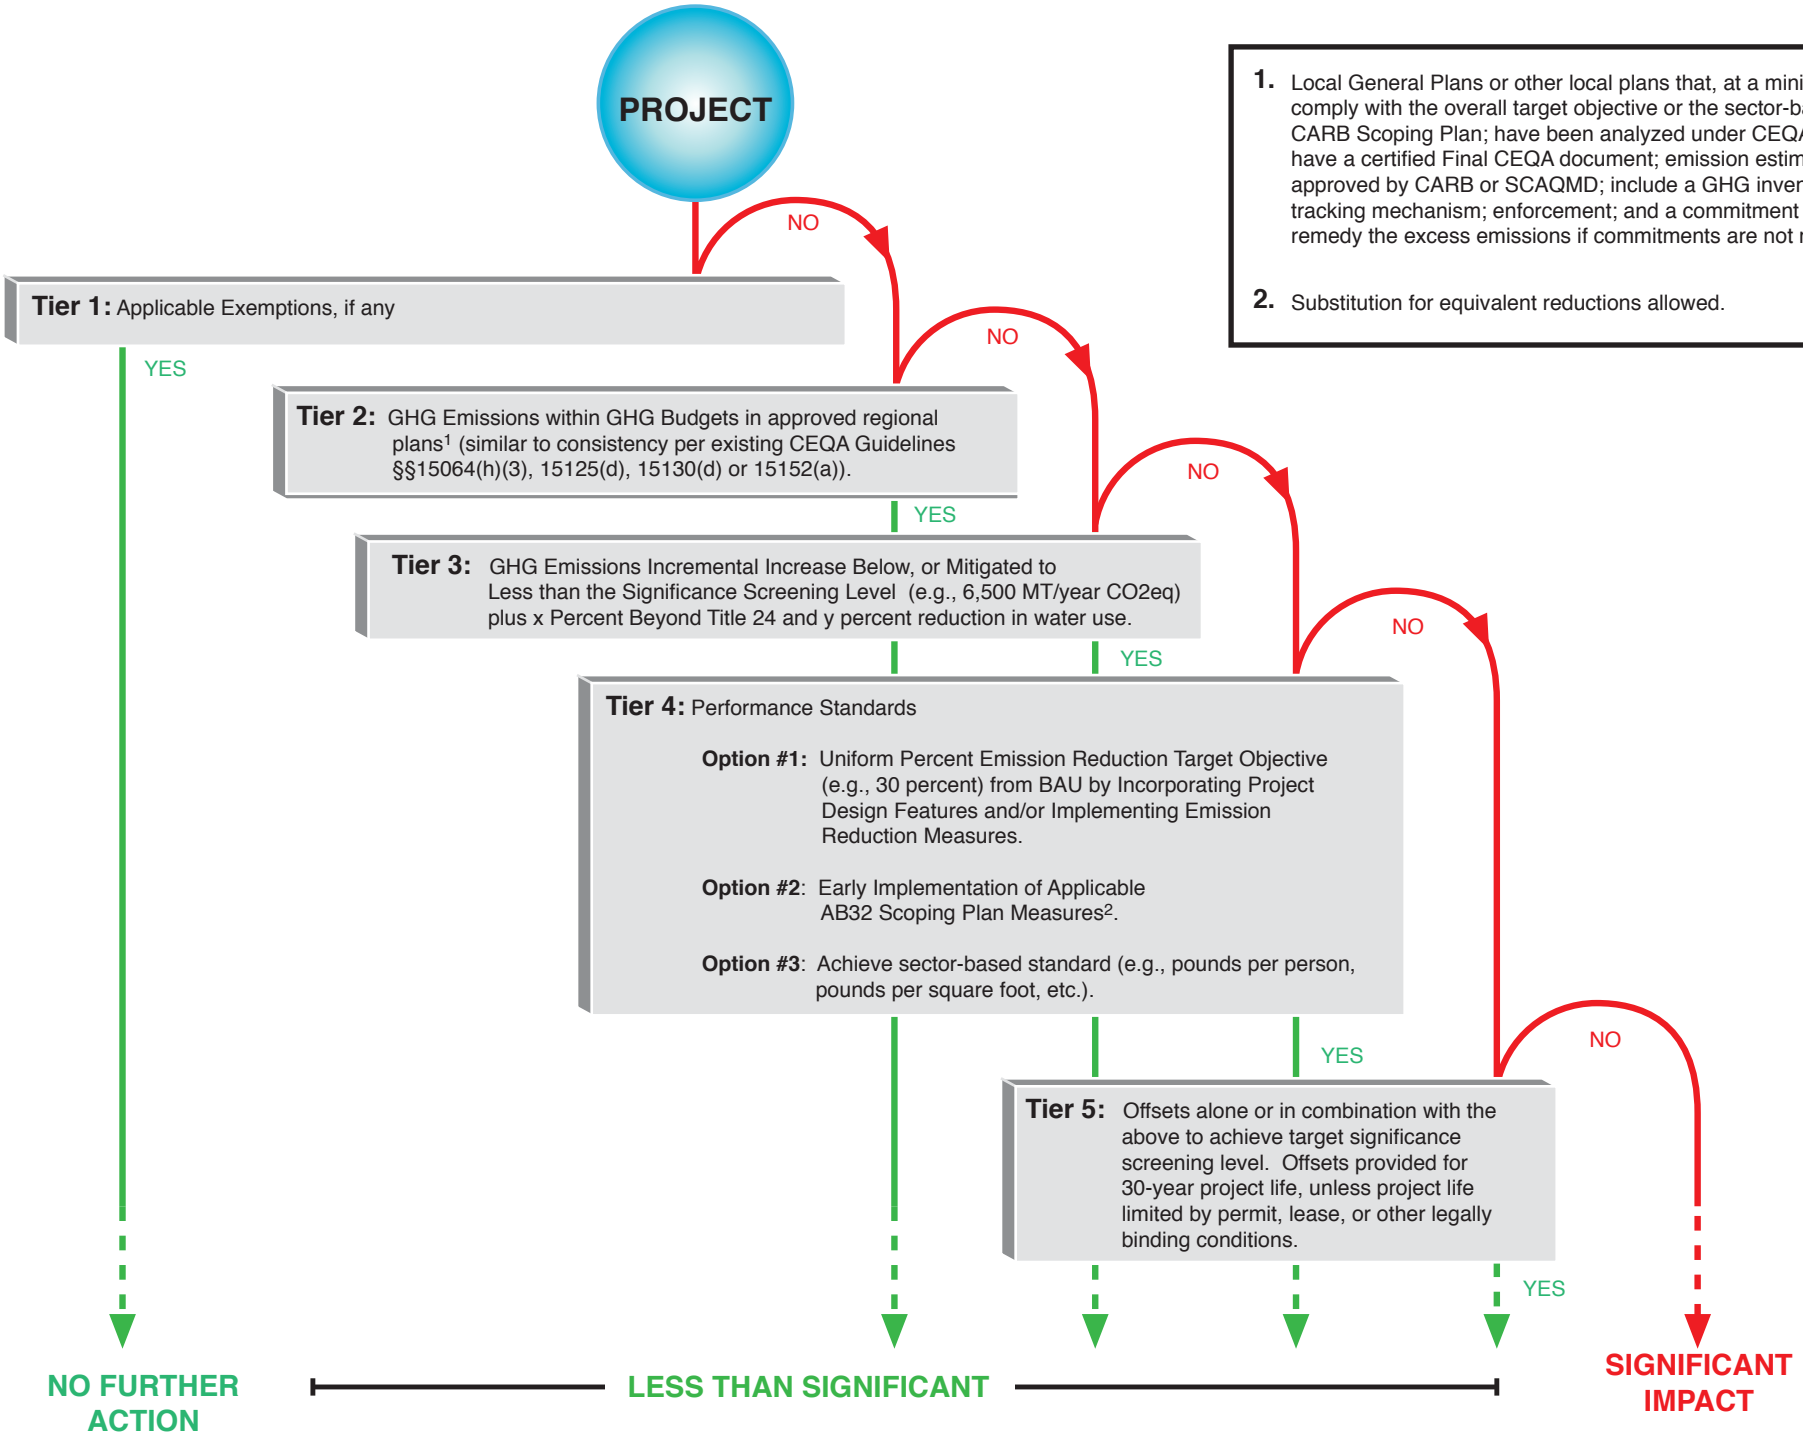
Draft AQMD Staff CEQA Greenhouse Gas Significance Threshold



1. Local General Plans or other local plans that, at a minimum, comply with the overall target objective or the sector-based CARB Scoping Plan; have been analyzed under CEQA, and have a certified Final CEQA document; emission estimates approved by CARB or SCAQMD; include a GHG inventory; tracking mechanism; enforcement; and a commitment to remedy the excess emissions if commitments are not met.

2. Substitution for equivalent reductions allowed.
