

## Chapter 5: Actions to Reduce Community Air Pollution

### Introduction

The CERP provides an overall path to reducing air pollution in the San Bernardino and Muscoy community. Through the development of the CERP the CSC identified air quality priorities based on sources of air pollution (e.g., neighborhood truck traffic, warehouses, railyards) that are of concern to the community. To reduce air pollution from these sources, the CSC developed a set of actions to be implemented by government agencies, organizations, businesses, and other entities.

### Chapter 5 Highlights

- Many new actions will be taken to address the community's air quality priorities
- These actions focus on reducing air pollution in this community
- South Coast AQMD will use many different strategies, such as regulation, incentives, outreach, enforcement, monitoring, and more
- Many actions also rely on effective collaborations with agencies, organizations, businesses, and others

### Community Air Quality Priorities

The community of San Bernardino and Muscoy identified neighborhood truck traffic, warehouses, the OmniTrans bus yard, railyards, and concrete batch plants and asphalt/aggregate plants as air quality priorities. These sources of air pollution are often located close to homes, schools, and other community areas where the public can be exposed to harmful pollutants. As a result, exposure reduction at schools, childcare centers, and homes is also a priority for the community.

### Ongoing efforts

The South Coast AQMD, CARB, and U.S. EPA have air quality regulations to reduce air pollution that apply to facilities in various source categories. The relevant agencies enforce these regulations. Additionally, the South Coast AQMD and CARB have begun the process of developing new requirements that would further reduce air pollution from sources prioritized by the community.

### Opportunities for Action

In addition to the ongoing efforts described above, the CSC developed new actions to reduce air pollution in the community. Each action is to be carried out based on a set of strategies, goals, and timelines. The entity (e.g., government agency or organization) responsible for the actions is also identified. The actions set forth in this chapter define a path to further reduce air pollution from sources in the San Bernardino and Muscoy community and provide additional protections for children at their schools.
