Compliance Test Protocols or Reports Routing

Compliance test protocols or reports shall not be sent directly to the Source Testing & Engineering Branch (STE). Sending compliance protocols and reports to STE will delay the evaluation process and may subject facilities to enforcement action (even if the document is submitted prior to a deadline). Testing laboratories shall also adhere to this requirement, if they are submitting protocols and reports on behalf of the facility.

It should be noted however, that all CEMS related test reports (certification tests, RATAs, etc.) should continue to be sent to the STE branch.   Please submit RECLAIM RATA results using South Coast AQMD's Electronic Data Reporting (EDR).

Please consult the table below to send the protocol or report to the proper South Coast AQMD staff. If you have questions, please contact Colin Eckerle at ceckerle@aqmd.gov or call him at 909-396-2476.

Reason for Test	Send to
Performance test to comply with permit to construct requirements	The South Coast AQMD Permit Engineer for the facility (as listed on the permit to construct)
Performance test to comply with Permit to Construct/ Permit to Operate (PC/PO) or Permit to Operate source test conditions	Compliance and Enforcement Division (sourcetesting@aqmd.gov)
Routine compliance test (i.e., equipment has permit to operate, or routine required rule compliance test)	Compliance and Enforcement Division (sourcetesting@aqmd.gov)
Rule 1147 tests and protocols (equipment has permit to operate but no source test performance conditions)	Compliance and Enforcement Division (sourcetesting@aqmd.gov)
RECLAIM Large Source [Rule 2012(j)(2)] or Process Unit [Rule 2012(j)(4)] compliance tests	Ryan Maxwell, Senior Air Quality Engineer, RECLAIM Admin.
Rule 1138 tests and protocols	CJ Chang, Air Quality Engineer II, Engineering & Permitting
Rules 1111, 1121, 1146.2 certification tests	CJ Chang, Air Quality Engineer II, Engineering & Permitting
Rule 1174 certification tests	Kellen Rayos del Sol, Air Quality Engineer II, Source Test Engineering
