Draft Hazardous Waste Facility Permit for Lighting Resources, LLC

South Coast Air Quality Management District (South Coast AQMD) staff appreciates the opportunity to provide comments on the above-mentioned document. In the Community Update, the Department of Toxic Substances Control (DTSC) proposes to renew a hazardous waste facility permit for the Lighting Resources, LLC facility (facility) to continue storage and treatment of hazardous waste for the next 10 years. The facility is located at 805 East Francis Street near the northwest corner of East Francis Street and South Bon View Avenue in the City of Ontario.

Because the hazardous waste facility permit would include closing an old lamp crushing machine and adding a new and cleaner lamp crushing machine in a new enclosed building at the facility, South Coast AQMD staff recommends that DTSC review and consider requirements of South Coast AQMD Rule 201 – Permit to Construct¹ and Rule 203 – Permit to Operate² for new or modified equipment in the Final Hazardous Waste Facility Permit.

If you have any questions or wish to discuss the comments, please feel free to contact Steve Tsumura, Air Quality Specialist, at stsumura@aqmd.gov.

Sincerely,

Lijin Sun
