

GUIDANCE FOR RULE 1466 APPLICABLE OPERATIONS

Statement of Purpose

The purpose of Rule 1466 is to minimize the amount of off-site fugitive dust emissions containing toxic air contaminants by reducing particulate emissions in the ambient air as a result of earth-moving activities, including, excavating, grading, handling, treating, stockpiling, transferring, and removing soil that contains applicable toxic air contaminants from sites that meet the applicability requirements of subdivision (b).

Supervisor Training

The rule requires applicable sites to have an on-site Dust Control Supervisor who has completed the South Coast AQMD Fugitive Dust Control Class.
