

DTSC's Exide Technologies Technical Advisory Group Meeting

EXIDE's Permitting and Status Update

**Amir Dejbakhsh
Assistant Deputy Executive Officer
SCAQMD, Engineering & Permitting Office**

**Salesian High School
DECEMBER 6, 2017**

SCAQMD Permitting Activities (Calendar Year 2017)

- March 23 Held a Public Consultation meeting at Resurrection Church
- May 26 Renewed/Updated Exide's federal Title V Permit for a new 5-year term.
- November 22 Revised Exide's May 26, 2017 federal Title V Permit (Advisory posted on SCAQMD Website and mailed to mailing list)

Exide Technologies Title V Renewal Permit (May 23, 2017)

During the Title V renewal process, SCAQMD revised the Title V permit to:

- ✓ Reflect the current configuration/operating status of air pollution control equipment including five (5) baghouses, a scrubber, and a vacuum sweeper
- ✓ Remove outdated compliance plans that were only applicable to operating secondary lead smelters
- ✓ Incorporate two new closure activities compliance plans (SCAQMD Rule 1420.1 Closure & Ambient Air Monitoring Plans)

Exide Technologies Title V Revised Permit (November 22, 2017)

SCAQMD revised Exide's Title V permit to improve control of any potential fugitive lead dust during closure activities by:

- ✓ Updating the SCAQMD Rule 1420.1 Closure Plan to be consistent with the DTSC's Closure Implementation Plan (CIP)
- ✓ Granting permits to four (4) new HEPA vacuums
- ✓ Updating vehicle/truck wash conditions

Exide Technologies Status Report

- ✓ Exide remains a non-operating secondary lead smelter and all furnaces have been removed and/or have been rendered inoperable
- ✓ Facility surveillance twice per week, once during normal business hours and once after hours
- ✓ No Notices of Violations issued or Complaints received
- ✓ SCAQMD Continues its regular unannounced inspections
- ✓ Exide continues with daily arsenic and lead ambient monitoring as required by Rule 1420.1
