South Coast AQMD Issues Smoke Advisory Due to Lake Fire Northeast of Castaic

Valid: Thursday, August 13, through Friday, August 14, 2020

This advisory is in effect through Friday afternoon. South Coast AQMD will issue an update if additional information becomes available.

A wildfire named the Lake Fire is burning northeast of Castaic in Los Angeles County, within the Angeles National Forest. As of 7:00 a.m. on Thursday, the burn area was 10,500 acres with 0% containment. Current information on the Lake Fire can be found on the Incident Information System (InciWeb) <https://inciweb.nwcg.gov/incident/6902/>.

Past and Current Smoke Impacts

The Lake Fire is producing heavy smoke this afternoon based on satellite imagery, webcam imagery and social media posts. Intense fire activity is currently generating large vertical smoke plumes, which is mainly concentrated to higher altitudes and moving to the northeast out of South Coast AQMD's jurisdiction. PM_{2.5} concentrations at the South Coast AQMD's monitor in Santa Clarita have been within the **Good to Moderate Air Quality** Index (AQI) index levels since Wednesday evening. Visit <https://www.aqmd.gov/aqdata> to view current air quality conditions.

Forecasted Smoke Impacts

- On Thursday afternoon winds are predicted to be from the southwest and will push smoke to the northeast out of South Coast AQMD's jurisdiction.
- On Thursday evening through Friday morning, winds will shift to come from the northwest and north. During this time, it is possible that some smoke may be transported down from the higher elevations to areas southeast and south of the fire, such as Castaic, Santa Clarita, and the Angeles National Forest. Elevated ground level concentrations of PM_{2.5} are expected overnight as the smoke is likely to remain closer to the ground.

- On Friday afternoon, winds near the fire will shift to come from the southwest and blow any smoke to the northeast out of South Coast AQMD's jurisdiction.

Overall, meteorological conditions may bring smoke and ash into portions of the San Gabriel Mountains and Santa Clarita Valley. **Unhealthy for Sensitive Groups or higher AQI levels** are possible in areas of direct smoke impacts.

In any area impacted by smoke: If you smell smoke or see ash due to a wildfire, limit your exposure by remaining indoors with windows and doors closed or seeking alternate shelter, and avoiding vigorous physical activity. For more tips on protecting yourself during a wildfire, see South Coast AQMD's Wildfire Smoke & Ash Health & Safety Tips page: <http://www.aqmd.gov/wildfire-health-info-smoke-tips>.

Areas of direct impacts and poor air quality may include portions of:

- **Los Angeles County:** Santa Clarita Valley (Area 13), San Gabriel Mountains (Area 15)
